THE WEEK IN STOCKS

BEARS FINALLY FORCED TO COVER AND SHARES REGAINED LOSS.

Weak Effort to Inject Bull Sentimer Into Trade Saturday-Local Markets Satisfactory.

At New York, Saturday, money on call was steady at 2021/2 per cent.; last loan, 2. Prime mercantile paper, 314@4 per cent. Sterling exchange was steady, with actual business in bankers' bills at \$4.87%@4.88 for demand and at \$4.85\\@4.85\\ for sixty days; posted rates, \$4.861/64.87 and \$4.89; commercial bills. \$4,87@4,87%.

Silver certificates, 61@62c; bar silver, 60%c; Mexican dollars, 481/2c.

The imports of specie for the week were \$41,526 gold and \$112,774 silver. The exports of gold and silver to all countries for the week aggregated \$84,042 silver bars and coin | not counted on and which made the outward and \$1,263,503 gold. The imports of dry goods and merchandise for the week were valued

The New York weekly bank statement shows the following changes:

Surplus reserve, decrease.....\$1,223,125 egal tenders, increase...... 47,300 sits, increase 356,500

The banks now hold \$45,710,600 in excess of the requirements of the 25 per cent. rule. The New York Financier says: "The changes in the statement of the associated banks of New York for the week ending June 3 are almost trivial compared with the heavy fluctuations of the past few weeks. It would seem that the culmination of a number of important matters had at last been passed, leaving the banks to report only routine operations of a comparatively dull week. The two holidays, coupled with the comparative quietness on the Stock Exchange for the remainder of the week, are reflected in the slight changes in the loan item, but the gain, small as it is, probably indicates that the period of heaviest liquidation is over. If this be true there is reason to believe that some use will be found for the accumulation of surplus funds at this center, and that rates may be maintained at something like a reasonable figure, although no advance of any significance is anticipated. The banks lost in cash during the week, according to the statement, \$1,134,000, all of which was in specie. Operations with the treasury are known to Lake Erie & Western have resulted in a decrease about as stated, but no account has been made of a much heavier gain from the interior, and the real facts are that the reserve is heavier than

"The shipment of \$1,000,000 in gold to Europe does not figure in the average. This incident had no effect whatever on the money market, as the transaction is understood to have been of a speculative na- | St. Paul & Omaha pref.... ture. It is doubtful if gold in any quantity will go abroad this summer. Certainly, if the loans of the banks begin to increase, exports will be checked unless there arises in domestic and foreign money markets a situation that now appears improbable. The

is to be inferred from the statement. De-

THE GOLD SHIPMENT.

banks ought to continue to gain from the interior for some time to come. The July ursements will be unusually heavy this year, and as there is nothing that will entall an unusual demand on the banks it appears that fluctuations in the money rate will rest solely on a revival of speculative activity, which now is regarded as certain. Total sales of stocks amounted to 289,170 | American Cotton Oil...... nares, including the following: American American Cotton Oil pref.. and Wire, 25,500; American Sugar, 21,000; American Tobacco, 4,000; Anaconda, 2,200; Atichison preferred, 12,700; Brooklyn Rapid Transit, 25,300; Chicago, Burlington & Quincy, 12,300; Federal Steel, 23,200; Federal preferred, 4,400; Louisville & Nash-3,500; Manhattan, 10,700; Metropolitan, Missouri Pacific, 6,400; National Steel, New York Central, 3,500; Northern acific, 6,000; Ontario & Western, 3,000; Pennsylvania, 6,100; People's Gas, 4,600; Reading first preferred, 4,000; St. Paul, 10,000; Tennessee Coal and Iron, 8,000; Union

BEARS FINALLY ROUTED. schemes of clever promoters will be scrutinized more severely. At present the market is undoubtedly depressed by the large The short week on the Stock Exchange has been characterized by a dashing camamounts of these new securities which have paign and quick retreat by the bears. They been offered to the public, and it is quite ikely that insiders will not be able to unfound a number of conditions in their favor as successfully as they once anticiwhen they returned to the street on pated. A few of the new concerns are worthy of public confidence, but many are Wednesday after the three days lay-off, not, and the situation to-day is much the better for the refusal of the public to take and they sold stocks with great confidence and soon broke the market. The exhaustion them. The trusts, we think, have come to of margins on the decline brought out a flood of long stocks which enabled the shorts to cover extensive lines at a good profit. Probably the most influential factor in determining the bear attack was the

stay. Prosperity is upon us and seems likely to remain with us for some time to come, so the combinations, good and bad, will probably continue successful until the next period of overproduction and reaction begins. Then the test must come abandonment of the purpose to sustain the price of the new amalgamated copper stock at or above par. The \$75,000,000 of stocks of this organization was largely oversubscribed at par and the payment of subscriptions was completed a week ago Monday. The subscribers were understood to include some of the most powerful financial interests in the country and the new "Meanwhile, what of railroad securities which have hitherto been the most popular form of investments? Our railroad systems are well developed and well established The era of instability, inseparable from the constructive period, has passed away. In future railroad bonds and stocks are destined to rank high among the safest investments in the country. As the Nation grows traffic cial interests in the country and the new must increase. Many of the roads are now stock was supported at or above par all last week in face of a very languid public demand. When the price was allowed to slump to 85 on Wednesday and Thursday in capitalized on a reasonable basis. The floating supply of their securities is limited, and while prices often seem high according to old standards of value, still in view of present conditions, such as large earnings, easy the outside market it was interpreted to mean that the powerful backers were not disposed to combat the reactionary tendency in prices for the present. Fortified by the acquiescence on the part of an element which had frustrated previous atmoney and a prospective continuance of prosperity, the conclusion seems inevitable that prices will go to a still higher leve as soon as speculative forces become more favorable. This week these forces have tempts to force down prices, the powerful bear party proceeded to work its will with been arrayed on the bear side, assisted by exaggerated fears of gold exports, yellow fever, the Ford bill, etc. None of these facno important opposition. A large body of security owners had for some time been in the position of inertly holding on, waiting for a further rise in prices. When the bears began to offer prices down by wide gap and the owners saw the value of their holdings being cut away from under them tors, in our opinion, is of any special importance. Just now it suits the interests of some of the biggest holders to permit a lecline. As soon as these parties are satisfled we shall see a renewal of the upward holdings being cut away from under them, they became alarmed and threw over their holdings indiscriminately. There was a number of potent factors in the general sitmovement, but whether that will be deferred until a further shaking out of weak holders has taken place or not time only will denumber of potent factors in the general sit-uation which aided the bear campaign. There was growing conviction the yield of wheat had been seriously curtailed by the damage to the winter grown plant. There was the report of a case of yellow fever at New Orleans and the action of the Texas termine. Sharp raids are apt to occur at any time in a market like the present one but so long as the present tide of prosperit continues no apprehensions need be indulged in about the future of the stock market. There were two adverse factors which nfluenced the market in the middle of the authorities in declaring quarantine against Louisiana-an action which necessarily imweek in a downward direction-one was the pairs the integrity of railroad earnings in the affected territory. There was the trade was in Gas in New York and in Sugar and the tax to be imposed on franchises under the new law, which it was rumored might lead to the reduction or passing of dividends on several stocks which hold an important place on the New York Stock case of yellow fever reported in New Orleans and the other was the advance in wheat. The scare which the latter produced was on a false theory. As a matter of fact, the advance in wheat was not due to additional crop damage reports on this side, but to such reports regarding the European important place on the New York Stock Exchange. There were showings of reduced earnings for April by the St. Paul, Burling, Northern Pacific and Union Pacific systems, for which subsequent crops, therefore, this should really have had the reverse effect on the stock market. As for yellow fever, the effect of that was much aggravated. As a matter of fact, that sey, 10.15c; Caracas, 9.65c; Dillworth's, 9.65c; disease is only attended with the danger of Mail Pouch, 9.65c; Gates's Blended Java, 9.65c. much aggravated. As a matter of fact, that spreading in the fall months and not in the plausible explanations were offered, but the greatest disaster were the traction and decrease in the sums available for distrigas properties, due to exaggerated estibution among stockholders. There was a mates of the probable effect of the Ford hardening tendency in exchange, foreshad-owing an outward movement of gold, which franchise bill. The industrials also came in for a heavy break, due to the fact that came in the announcement after banking there has become a very limited market now hours on Thursday of an engagement of \$1,000,000 for shipment to Europe. The fact for their distribution, consesquently even moderate liquidation in them makes inroads this engagement was made after an easing in their quoted prices. Railroad stocks, owof the rates for sterling exchange led some ing to their better backing and cheap exchange bankers to question whether the money, maintained themselves remarkably operation could yield a profit as an ordiwell, thus showing that confidence in such nary exchange transaction. The fact that securities on the part of investors has not been materially weakened. The bears doubtit was made by the institution that financed the Amalgamated Copper Company and also the payment of the Philippine indemnity may serve as an explanation. The purpose less have had in view recently, considering the close approximations of sterling exchange to the gold shipping point, the sendwas to provide for the payment to Spain so as to avoid the export of gold and a suf-ficient amount of foreign exchange was acing of some gold out of the country, even ugh it was not attended with a profit, thinking thereby its moral effect would be cumulated to cover the amount due to Spain so the gold (or certificates of gold) could be an influence on their side of the market. Yesterday's announcement that \$1,000,000 of transferred from the subtreasury in New York to the banking institution. It was the precious metal was to be shipped failed to produce the effect expected, as the marobviously a corollary of the plan to set off ket went decidedly in a contrary direction. foreign obligations to the bank, including, presumably, foreign subscriptions to the thus showing that gold exports are not re garded as a serious matter after all under new copper company, to make up the forpresent conditions, especially as this couneign credits turned over to the government try now stands on the top of the list of a plethoric condition in the local New York nations in its gold holdings, the amount of which is now estimated at about \$1,000,000,market and a hardening tendency on the London money market, which were 000. This is the best showing that this country has ever made and no other has ever equaled it. We can therefore well afford movement of gold necessary to restore the balance. The relief to the London money to ship a few billions to Europe without any injurious effect, as they will not be market gave strength to the stock market there, which spread to Americans and was missed. As a matter of fact, it will be beneficial in an indirect way to this couneffected back on the New York stock market. This, with the fall in wheat, the subtry, as it will in all probability go to Lonsidence of the yellow fever scare and good don and increase their gold supply, which is comparatively small at the present time, prospects in the anthracite trade, led to the late recovery in prices and a general covering of short contracts. Prices recovered in that quarter for American securities as to the previous week's level or above all well as the disposition to carry over Americans at lower rates of interest. The rate Bonds sold off in sympathy with stocks charged there was 41/2 per cent. at the last settling day, which is certainly a pretty steep rate considering the outside rate for but they were later in yielding and declines were much less marked. LOCAL GRAIN AND PRODUCE. Week of Very Satisfactory Trade

and Steady, Firm Prices. It is no exaggeration to state that never before at this season of the year has the volume of trade been more healthy in its proportions and prices stronger or more steady, although in many lines goods are sold on small margins, as in the case of dry goods, staple groceries, flour and provisions. In iron and steel products prices are very firm. The promptness with which bills are being met is very much appreciated. Prices rule unusually steady and have for many months past. established. Steadiness is a marked feature in erned much by the receipts. In strawberries the market was glutted four days of the week, but was quite well cleaned up on Saturday. The local grain market for some days past has

been quite active, although on Saturday inspections dropped off considerably, but during the week an average of seventy carloads of corn was inspected. lette Park addition

Washington Special in Philadelphia Tele-During the many years I have been engaged in newspaper work it has ever been my experience that a willing subject for interview is seldom productive of a valuable result. An interview with a man who is eager to talk is usually either commonplace or prompted by a selfish motive. Give me every time the man who will not have anything to say for publication when approached by a member of the press. He will deal in monosyllables, but it depends upon the interviewer to cause him to be more

BETTER WHEAT PRICES

WEAKNESS AT THE OPENING CAUSED BY LOWER CABLE NEWS.

Crop Damage in Europe Later Proved Too Much for the Bears and Prices Shot Up-Pork Higher.

CHICAGO, June 3 .- Wheat ruled strong to-day, July closing with a gain of %c. Corn advanced %c and oats 1/2c. Pork rose 71/2 and ribs 21/2@5c. Lard closed a shade higher. The sentiment among wheat traders at the opening was rather bearish, owing to heavy Northwest receipts, poor shipping demand and weak outside markets. The tide soon turned, however, and covering was influenced by confirmatory reports of drought in the Black Sea territory. Domestic crop news was also discouragingly bad and added to the advance, the market closing within a fraction of the top. July opened unchanged at 76%@76%c, declined to 76%c, advanced to 77%c and closed at 77%@77%c Chicago received seventy-six cars, six of which graded contract. Minneapolis and Duluth got 643, compared with 164 for the same day a year ago. The aggregate at Western primary markets was 835,000 bushels against 253,000 bushels last year. Atlantic port clearances of wheat and flour equalled 208,000 bushels. The world's shipments for the week to Europe were estimated at 7,600,000 bushels. Complaints of damage from excessive

rains and an improved cash demand strengthened corn. Receipts, 523 cars. July opened unchanged at 33%c and advanced to 34c at the close.

Oats rallied on covering based on unfavorable crop reports. Receipts, 308 cars. July started 1/sc lower at 23c, and advanced to 23%c at the close.

Provisions ruled easy at the start, but

rallied near the close in sympathy with the advance in grains. July pork opened 21/20 lower at \$8.071/2, and advanced to \$8.171/2 at the close. Lard and ribs were dull with fluctuations small.

Estimated receipts for Monday-Wheat,

70 cars; corn, 360; oats, 290; hogs, 41,000 Leading futures ranged as follows: Articles. BLACK LEG OR BLACK QUARTER

An Infectious Cattle Disease and Its Symptoms and Treatment.

"Black leg or black quarter," said Prof. A. W. Bitting, veterinarian of the agricultural experiment station at Purdue University, "is an acute infectious disease usually affecting young cattle from six months to two years of age. Sucking calves do not contract the disease, and while it may occur in old cattle, it is not liable to do so. The disease occurs most frequently in cattle in high state of nutrition and grazing upon rich pasture, and is caused by a germ that is found in the soil and on the grass, especially in low or bottom land. The disease is not contagious but the occurrence of one or two cases upon a certain field shows local infection and indicates that other cattle may suffer in like manner.

"The general symptoms are duliness, loss appetite, cessation of rumination, fever, stiffness and lameness. Swellings occur under the skin, about the flank, thigh, behind the fore limb and breast. These swellings may be the first thing noticed. They may be small or quite diffuse. They are painful at first, but later become insensitive. They pit and crackle under pressure, and if opened a reddish black frothy fluid will be discharged. The disease lasts from a few hours to two or three days and nearly always proves fatal. In old cattle the course is somewhat slower.

"Medicinal treatment is not a success A few animals will recover under good treatment, but there is no particular line that can be followed with a fair degree of success. Tincture of muriate of iron may be given in doses of one table spoonful for each thousand pounds live weight every four hours. In the interval a similar dose of chlorate of potash may be administered.
"The better method is to use preventive neasures, which consist in vaccination, People owning pastures where such disease is known to exist can vaccinate their stock early in the season and feel assured that there will be little or no loss. Vaccination has been so largely used and thoroughly tried by experiment stations and by individuals that it is no longer an experiment. Last year a large number of cases were reported in this State, and it is to be expected that the disease will soon recur again this year. The veterinary department of the Experiment Station will be glad to receive reports of outbreaks of this and other diseases during the season.

WHAT WE EAT. Diet Alone May Change Our Constitu-

The ordinary person eats a few more than thousand meals during a year, and if living to the age of forty years consu not less than forty tons of solid and liqu aliment. This great amount of nourishment serves the twofold purpose of maintaining the warmth of the body and of repairing the waste of tissue caused by exercise.

Many of the lower forms of living beings absorb their food directly from the sur-rounding world without first subjecting it to any particular changes. Plants absorb gases from the atmosphere, and thus build up their parts. These gases, previous to absorption, undergo no treatment by digestive fluids secreted by the plant. Man resembles the plant in second of the plant. sembles the plant, inasmuch as important articles of nutrition are received directly from the inorganic world, but certain physical and chemical changes affect the food

before it is fitted for absorption. There is no doubt that the whole consti-tution of the body may be changed by diet alone. By it the fluids may be thinned or condensed, rendered mild or acrid, coagu-lated or diluted to almost any degree. Even brief attention to these things shows how regimen. It is not an easy matter to ascer-tain the exact amount of food proper for every age and constitution, for it was never intended that mankind should measure and weigh their food. We are taught by nature when we have enough, but the quality of the food we use merits especial considera-

To wander through a great city's market place in company with a man skilled in the chemistry of foods is a means of acquiring much interesting and valuable information concerning what we eat.

Few in all that crowd of eager buyers who throng every nook and alleyway to think that steak of a light red color having white fat is the tenderest and juic-iest. The flesh of a bullock about the age of four years furnishes the best and strong-est nourishment, and is peculiarly well adapted for the use of those abor or take much exercise. It will often lie easy on the stomach that can digest no other kind of food. Veal not younger than four months is considered a proper food for persons recovering from an indisposition, and may even be given to fever patients in a very weak state, but it affords less nourishment than the flesh of the older animal; it is easy of digestion, yet of all meats is least suitable for removing acidity of the
